EXPERIENCE

MERN Stack Developer (Intern) Jan 2025 – Present
Bridgeon Solutions | Knifra Infotech – Calicut, Kerala

- Delivered 2 production-level projects — a Hospital Management System (individual) and a CRM + Restaurant Management System (3-member team) — from planning through deployment
- Engineered real-time features including appointment booking, video calls, live chat, and payment integration using Socket.io, WebRTC, and Razorpay
- Architected JWT authentication with RBAC across 5+ user roles and built reusable React components to speed up frontend development
- Drove Agile delivery through Git/GitHub, Postman, and ClickUp workflows, leading regular code reviews to maintain code quality

PROJECTS

Hospital Management System – Full Stack MERN | MediCares - Hospital Management System
React.js, Node.js, Express.js, MongoDB, JWT, Redux Toolkit, Zustand, Razorpay, Socket.io, WebRTC, Tailwind CSS

- Identified a critical gap in traditional hospital queuing systems, where long wait times and inconsistent doctor availability created a poor patient experience, and engineered an online booking flow enabling real-time doctor availability checks and instant slot booking, while retaining offline token support for walk-in patients
- Engineered a full-stack Hospital Management System with 5 user roles (Admin, Doctor, Staff, Patient, Pharmacist) using JWT + RBAC
- Implemented online/offline appointment booking, doctor scheduling, and real-time availability management
- Integrated real-time chat, video consultations via WebRTC, Razorpay payments, and patient feedback system
- Designed modular backend and reusable UI components, boosting delivery speed by 25%

DineFlow – SaaS CRM Platform for Restaurants | Team Project (3 Members) Ongoing
Next.js, Node.js, Express.js, MongoDB, AWS, Razorpay, PostgreSQL

- Designed a restaurant discovery and ordering flow that lets users search nearby restaurants, browse menus, and book both food orders and table reservations through a single platform
- Collaborated in a 3-member Agile team to build a scalable SaaS CRM serving 50+ restaurants, reducing manual work by 40%
- Enhanced 5+ core modules (user roles, analytics, alerts, feedback, payments), improving overall system performance
- Maintained Git/GitHub workflows with branching, PRs, and code reviews to ensure quality and smooth sprint delivery
- Optimized database schemas and authentication system, reducing delivery time by 25%

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery

Backend: Node.js, Express.js, RESTful API Design, MVC Architecture, JWT Authentication, Role-Based Access Control (RBAC), Socket.io, WebRTC

Databases: MongoDB, Mongoose, PostgreSQL, Database Design, Schema Modeling

DevOps & Tools: AWS, Git, GitHub, Postman, CI/CD (Basic), Razorpay API Integration, ClickUp, Notion

Soft Skills: Agile/Scrum, Teamwork, Cross-functional Collaboration, Technical Communication, Code Review, QA, Problem Solving

EDUCATION

Diploma in Refrigeration and Air Conditioning Engineering
Technical Training Institute, Kondotty — 2-Year Diploma
