SKILLS

Backend Development

Node.js || Express.js || RESTful API Design || MVC Pattern Architecture || JWT Authentication || Monolithic Architecture

Databases

MongoDB || Mongoose || PostgreSQL || Database Design || Schema Modeling

Soft Skills

Agile || Teamwork Cross-functional Collaboration || Technical Communication || Requirement Analysis || Code Re-view || Quality Assurance

Frontend Development

React.js || Next.js || Redux & Toolkit || TypeScript || JavaScript (ES6+) || HTML5 || CSS3 || Tailwind || CSS || Bootstrap || jQuery

DevOps & Tools

AWS || Git || GitHub || Postman || CI/CD (basic) || Razorpay API || Notion || ClickUp || Socket.io || WebRTC

PROJECTS

Hospital Management System (Full-Stack MERN),

Tech: React.js, Node.js, Express.js, MongoDB, JWT, Redux Toolkit, Razorpay, Socket.io, WebRTC, Tailwind.

- Developed a full-stack Hospital Management System with 5 user roles using JWT authentication and RBAC.
- Implemented online/offline appointment booking, doctor scheduling, and availability management.
- Integrated real-time chat, video consultations, Razorpay payments, and patient feedback.
- Built a modular backend and reusable UI components, improving maintainability and reducing development time by 20%.

DineFlow (SaaS CRM Automation Platform for Restaurants (Ongoing)),

Tech: Next.js, Node.js, Express.js, MongoDB, AWS, Razorpay

- Collaborated in a 3-member Agile team to build a scalable SaaS CRM for 50+ restaurants, reducing manual work by 40%.
- Developed 5+ core modules (user roles, analytics, alerts, feedback, payments), improving overall system functionality.
- Used Git/GitHub workflows (branching, PRs, code reviews) to ensure code quality and smooth sprint delivery.
- Designed optimized database schemas and a shared authentication system, reducing development time by 25%.

EXPERIENCE

MERN Stack Developer (Intern), Bridgeon Solutions | Knifra Infotech

01/2025 – Present

- Worked on 2 projects: Hospital Management System (individual) and CRM + Restaurant Management System (team of 3).
- Built features like appointment booking, video calls, live chat, and payments using Socket.IO, WebRTC, and Razorpay.
- Implemented JWT authentication with RBAC (5+ roles) and developed reusable React components.
- Followed Agile methodology and collaborated using Git/GitHub, Postman, and ClickUp, with regular code reviews.
