NUHMANU IBNU SHIBLY

MERN Stack Developer | Full Stack Developer

nuhmanushibly@gmail.com • +91 7592933286 • Kerala, India (Open to Relocation)
LinkedIn • GitHub • Portfolio

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful API Design, MVC Architecture, JWT Authentication, Role-Based Access Control (RBAC), Socket.io, WebRTC

Databases: MongoDB, Mongoose, PostgreSQL, Database Design, Schema Modeling

Tools & DevOps: AWS, Git, GitHub, Postman, CI/CD (Basic), Razorpay API Integration, ClickUp, Notion, Agile/Scrum

Core CS: Data Structures & Algorithms (DSA), System Design — ongoing self-study

Competencies: Full Stack Development, API Integration, Performance Optimization, Cross-Functional Collaboration, Scalable Architecture, Database Optimization

EXPERIENCE

MERN Stack Developer (Intern)
Jun 2025 – May 2026

Bridgeon Solutions (Knifra Infotech) — Calicut, Kerala

- Spearheaded delivery of 2 production-level full-stack projects — a Hospital Management System (individual) and a CRM + Restaurant Management SaaS Platform (3-member team) — from planning through deployment.
- Engineered and enhanced 4 real-time features — appointment booking, video consultations, live chat, and payment processing — using Socket.io, WebRTC, and Razorpay.
- Architected and implemented JWT authentication with Role-Based Access Control (RBAC) across 5+ user roles; built reusable React components to accelerate frontend development.
- Streamlined Agile delivery across 2 production-level projects through Git/GitHub, Postman, and ClickUp workflows, leading regular code reviews to maintain and improve code quality.
- Deployed and maintained applications on AWS across development and production environments, monitoring performance and uptime.
- Designed and optimized MongoDB and PostgreSQL database schemas across 2 production-level projects to support scalable, maintainable data models.
- Debugged and resolved production issues through systematic testing, collaborating with cross-functional team members to improve system reliability.

PROJECTS

Hospital Management System
Full Stack MERN Application

React.js, Node.js, Express.js, MongoDB, JWT, Redux Toolkit, Zustand, Razorpay, Socket.io, WebRTC, Tailwind CSS

- Designed and built a full-stack Hospital Management System with 5 user roles (Admin, Doctor, Staff, Patient, Pharmacist) using JWT + RBAC, solving long wait times with real-time doctor availability and instant slot booking.
- Implemented online/offline appointment booking, real-time chat, video consultations (WebRTC), Razorpay payments, and a patient feedback system; cut delivery time by 25% using reusable, modular components.

DineFlow — SaaS CRM Platform for Restaurants
Team Project, 3 Members

Next.js, Node.js, Express.js, MongoDB, PostgreSQL, AWS, Razorpay

- Developed a restaurant discovery and ordering platform serving 50+ restaurants, enabling nearby search, menu browsing, food ordering, and table reservations in one flow — reducing manual work by 40%.
- Enhanced and streamlined 5+ core modules (user roles, analytics, alerts, feedback, payments); refined database schemas and authentication, reducing delivery time by 25%.

EDUCATION

Bachelor of Computer Applications (BCA)

Manipal University Online
